

Utility Patent info

- 1) E Z Patch
- 2) Idea was invented and created on June 1,2000 by
Blake A. Bohinc
30 Stempler Court
Holmdel, NJ 07701
and
James J. Fleck
570 N. Lake Shore Drive
Brick, NJ 08723
- 3) E Z Patch was invented to solve a common problem in the construction, plumbing, electrical, sheetrock and any type of home, personal, office or business use.
The idea was first thought up when the common problem occurred on how to quickly and effectively repair a hole or damaged area in the home or office, in the wall, ceiling or even possibly the floor. E Z Patch itself comes in a variety of sizes; with each size also have the capabilities of being able to be easily modified and or trimmed to fit each hole precisely. E Z Patch is easily applied to the damaged area using the self-adhesive backing. Its advantage, not only in labor and time saved, but allowing the average homeowner to easily make the necessary repair!
- 4) The drawing shows various views including: isometric, plan and elevation view. The drawing only represents but only 1 size E Z Patch. Sizes available will be from 1/2" up to and including 6".
